ENVIRONMENTAL COMPLIANCE CHARGE
 Maintaining and repairing your car inevitably involves the use of chemicals and generation of wastes (solvents, oils, caustics, lead, asbestos, etc.) that must be stored, managed and disposed of in strict compliance with federal, state and local environmental regulations. We support these regulations and also believe our customers do too because they help ensure a safer, healthier environment for everyone. Complying with these regulations increases the cost of service. Ordinarily, increased costs simply result in an increased hourly labor charge. This dealership has decided in lieu of raising its labor rate, to list a compliance charge on appropriate service bills because we believe our customers would be interested to know that they are helping to pay for a cleaner environment.
